Renovation of the Berlin State Opera data network

- The Berlin State Opera

[Renovation of the Berlin State Opera data network](#) [2]

In the context of the total restoration of the Unter den Linden State Opera in Berlin, SPIE Deutschland System Integration was awarded a 3-year contract to upgrade this prestigious cultural institution's data network.

Restoration work on the Berlin State Opera began in September 2010. The project aims to renovate the State Opera buildings, including management offices, stocks and the new rehearsal halls. Also on the agenda: upgrading the connecting structure and technical installations on the stage. The contract is valued at €1.2 million.

For the restoration project, SPIE Deutschland System Integration installed a passive data network, as well a high-performance Cisco infrastructure. The subsidiary also supplied a Unified Computing System (UCS), a data centre, a Virtual Switching System (VSS) core, a voice over Wi-Fi infrastructure, as well as all the necessary services and parts.
