[TOTAL refinery in Feyzin \[2\]](#)

At its Feyzin site located south of Lyon, TOTAL operates units that refine crude oil into commercial products for the industrial and mass markets. The refinery supplies gasoline and several thousand by-products to nearby plants in France's "Chemical Valley."

A partner of the site since its establishment in 1964, SPIE provides maintenance for instrumentation and electrical systems, while also operating and maintaining high-voltage installations. For this contract, SPIE outlines and meets concrete objectives, enacts an improvement plan and works to optimize TOTAL's performance.

On the Feyzin site, SPIE's Industries teams take part in a wide range of construction and improvement projects for specific units. To improve the security and productivity of the site, the teams integrate solutions to ensure compliance with new regulations and environmental standards.

Two of SPIE Sud-Est's subsidiaries, C Tram and GB Analyse, also work on this site. C Tram provides mechanical engineering, while GB Analyse supplies [industrial analysis](#) [3].
