Press release

Cooperation between SPIE Ouest-Centre and SEGECE: Shared ambitions for a major project!

SPIE Ouest-Centre is currently working with SEGECE, mainland Europe's leading shopping centre management company, on a project to renovate and extend the Beaulieu shopping centre in Nantes. SEGECE awarded us a combined HVAC and electrical engineering work package for this project. The deal is worth a total of €5.870 million, of which €1.940 million for the HVAC work and €3.930 million for the electrical contracting. SPIE Ouest-Centre is involved in renovating the shopping arcade (12,000 m²) and building an arcade extension (9,000 m²) and five-storey outdoor car park. The HVAC work includes heating, ventilation and cooling systems for the extension, as well as rehabilitating the air circulation system in the existing arcade, overhauling the chilled water production system and installing toilet facilities and a standpipe- and dry riser-based fire protection system. The electrical contracting work involves both high- and low-voltage systems. Work is scheduled to begin in April 2007 and will continue until April 2008. This project is unusual inasmuch as the shopping arcade is to remain open throughout the work. Contacts:
