## Fire alarm detection installation at Unipres' manufacturing plant

### [Fire alarm detection installation at Unipres' manufacturing plant](#) [3]

As part of the extension works at Unipres' manufacturing plant in Sunderland (United Kingdom), Unipres, a manufacturer of pressed parts for automobiles, awarded SPIE UK for the supply, installation and commissioning of additional Fire Alarm detection and graphics.

SPIE installed a new fire detection and alarm control panel in the new plant room of the building, as well as diverting some of the existing loops to the new control panel. The new extensions will be served with 3 loops and populated with Apollo Discovery multi-sensors, call points and interfaces. The existing format of 110dB conventional sounder beacons will be continued into the new extensions and will be served from the new control panel.

SPIE installed an Advanced Fire Alarm panel with a built in fully operational graphics LED screen. The panel incorporates bitmaps and zone diagrams with live alarm location updates enabling ease of use for the end users.
