Press release

Industry - SPIE Est consolidates its expertise in the steelmaking industry

Ascometal, a supplier of special steels for the automotive and mechanical engineering industries, has launched a plan to modernise its rolling mill in Hagondange, Moselle. In 2006, Ascometal chose the Lorraine Champagne-Ardenne regional office's Industry department to carry out electrotechnical work for the site's new industrial water treatment pumping station. It has now turned to SPIE Est again for the supply of an on-line ultrasonic dimensional inspection system. These services are worth a total of €940,000. At the same time, Danieli, a company specialising in mechanical engineering and a supplier to Ascometal, has entrusted SPIE Est with electrical work for the rolling mill. This contract is worth more than €600,000. These operations are scheduled for completion at the end of August 2007. Contact SPIE SA
