Press release

Netherlands: SPIE Building Systems, official partner of Minderwatt®

The division SPIE Building Systems of SPIE Nederland, in Terneuzen, has become a partner of Minderwatt®, a company specialised in reducing energy costs.

This partnership strengthens SPIE Building Systems' ability as a technical service provider to meet the market's increasing demand for sustainable and energy-saving lighting solutions. SPIE offers energy-efficient lighting solutions for offices, public buildings and businesses to optimise energy savings while providing a pleasant work environment. The unique feature of the approach adopted by SPIE and Minderwatt® is that it offers financing solutions as well as services related to applications, inventories, consulting, lighting plans and costing. SPIE Building Systems receives numerous enquiries from customers who are constantly faced with unreliable product information on energy-saving solutions and applicable light sources. Having developed its business in response to these questions and market developments, Minderwatt® supplies objective advice and proven expertise with the backing of its locally operational partners  and they now include SPIE.
