Press release

SPIE Ile-de-France Nord-Ouest wins the urban video surveillance contract for the town of Etampes

The town of Etampes has entrusted the supply of its urban video surveillance system to the Paris Sud-Est Office of Spie's Ile-de-France regional network. The services to be provided comprise:

- deployment of a 24-kilometre long optical loop for the "image" application and, at a subsequent phase, to carry the urban area's voice and data flows;
- installation of 60 fixed cameras fixes and mobile domes;
- provision of equipment for the central control station operated by the municipal police department.

The work will be carried out in accordance with new directives defined in the Order of 26 September 2006, specifying technical standards for video surveillance systems and the protection of individual freedom. The contract, which was awarded in December, consists of one binding part and two conditional parts worth a total of €1.5 million and is to be completed within a maximum of 36 months. Contact:
