Press release

SPIE Nucléaire performs maintenance on soot blowing equipment for three EDF thermal power plants

The Nord Energy Production Department has won a contract through its Saint Laurent Blangy office for the maintenance of soot blowing equipment in thermal power plants at Cordemais, La Maxe and Blénod. This contract worth more a million euros is for a six-year period with no undertaking on the volume of work (which will be invoiced on a list price basis), so the work load can be more evenly distributed. These maintenance operations are to be carried out with the equipment in operation.
