Press release

SPIE Ouest-Centre strengthens its relationship with a major cosmetics company

SPIE Ouest-Centre is a preferred partner at Parfums Christian Dior's global fragrance production facility in St Jean de Braye, near Orléans. The Val de Loire office has traditionally provided automation and industrial transfer services at the site. In recent months, we have considerably reinforced our position with this customer by also becoming an HVAC and electrical contracting partner. One of the latest projects involves modernising the site's security systems, in a contract worth 500,000 euros. We are deploying a global management system comprising three subsystems:

- Site access control (200-reader TIL system),
- Video surveillance (47 Hymatom cameras, including 20 mobile cameras)
- PcVue supervision (approximately 1,500 alarm points relayed by a network of PLCs, some of which are being replaced and linked in an Ethernet network).

All of the subsystems are interactive and intercommunicate constantly. The work, which began in September, will run until the end of 2006. This project reflects our determination to use our expertise in highly technical businesses as a beachhead from which to penetrate the cosmetics industry.
