

With services in energy, electricity, instrumentation, mechanics, industrial piping, automated systems, traffic management and HVAC systems, SPIE Belgium supports companies throughout the entire life cycle of their facilities.

From design to maintenance, SPIE Belgium offers a complete set of tailored services. Its goals are to help companies add value to their assets, improve their cost management and focus on their core businesses. With a workforce of 1,200 employees at 10 locations in Belgium and Luxembourg, SPIE Belgium combines expertise and performance to deliver optimal results across a full line of technical services. Through local, proactive and flexible services, SPIE Belgium helps its customers reach goals and build a sustainable future.

With a focus on innovation and efficiency, the subsidiary's teams work on a daily basis to provide customers with the best new technology, while offering solutions adapted to competitor and safety objectives in every sector.

The subsidiary includes four divisions:

- [Industry](#) [1]
- [Building Systems](#) [2]
- [Infrastructure](#) [3]
- [Services](#) [4]

key figures
