

Vigicité: IP video surveillance solution for public safety and transportation security

Safety is the main issue for public and governmental authorities and transport operators....

Prevention

- Protect specific areas
- Spot suspicious places and behaviours
- Make people feel safer

Action

- Alert the operator and anticipate events
- Support decision-making
- Rapidly process events

Vigicité video surveillance management system helps protecting people and property, as well as monitoring road traffic and provides surveillance of complex transportation networks.

Security

- Enable first responders to react more quickly and intelligently to emergencies
- Protect people and property with respect to legislation
- Monitor public places effectively:
 - public buildings and places
 - car parks
 - public transportation networks
 - road traffic

Communication

- Helps cooperation between safety organisations
- Helps coordinated responses to events
- Track events and corresponding responses

... Vigicité

video management software solution is a key component of SPIE's comprehensive video surveillance solution.

... **VigiCité** video management software solution is a key component of SPIE's comprehensive video surveillance solution

EXTERNAL APPLICATIONS

- Aid Systems
- Image analysis
- CTM Supervisor

EXPLOITANTS OPERATORS

- Local authorities
- Motorway operators
- Police
- ...

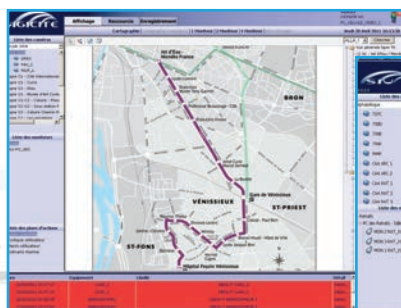

RESTITUTION

- Application
- Video wall
- Software decoding

EQUIPMENT

- Video cameras
- Access control
- Recording systems

Mapping and synoptic representation

Real-time and non-real time video operation

- Schematic or map-based views
- Event management and log book application
- Geolocation of equipment and events
- Installation on general-purpose workstations (Thin Client)
- Predefined and event-triggered action plans
- Records management aid tools (Events etc.)
- Modular, upgradeable solution
- Web based; no dedicated installation on operator workstations required. The software is deployed immediately and is quickly adopted by staff.

... a **solution adapted** to the needs of local authorities, complying with applicable standards while integrating their operating procedures and the market's major manufacturers.
